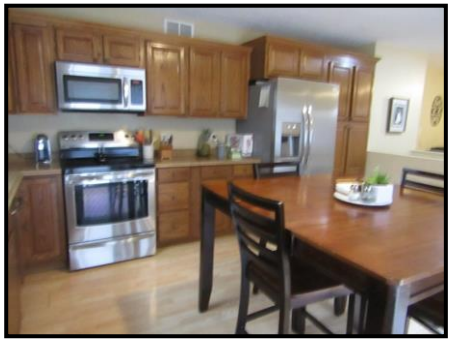
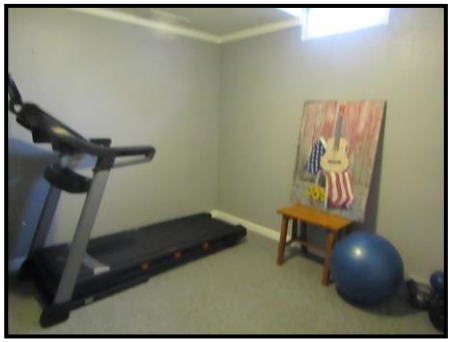
The minute you walk into the front door, you will love the open space, very few walls, allowing the living area and kitchen/dining area of the home to flow together. The open staircase to the basement is in the center of the home making great access to basement level and keeping the basement level more a part of the home.

The kitchen is very spacious and is certain to be the hub of the home. You will love all the counter space and the abundance of cabinets. This is a kitchen where nobody has to step around each other to get from the sink to the frig. There are tasteful stainless-steel appliances which are included. There is easy access to the patio and rear yard from the kitchen.

There are two spacious bedrooms on the main floor and three more bedrooms in the finished basement. One of those bedrooms offers some built-in areas, allowing this room to be a perfect home office or den.
The rear yard is fenced in and there is lots of room for the kids and fur babies to run and play. The patio area if right off the kitchen, making cookouts easy and enjoyable.




Don't be shy, look at this home and begin the process of making this home become your new "Home Story" for your family and you!
