

Home

You won't want to delay long, calling Molly to make your appointment to view this newly listed "fantastic" home. This is a home that has been loved and well cared for. It is a home that will speak to you the minute you walk into the front door.

The living room has wonderful west windows which bring great sunlight into this already comfy room. The living room has neutral wall and floor treatments that allow you to easily mix simple antiques and furniture with floral patterns or contemporary whites.

There is a formal dining room that is centrally located between the living room and the kitchen. A formal dining room is rare to find in today's housing market and just one of the extra features that make this home a standout. This room would also be a great library/den area.

There is always lots of life in a home's kitchen. Big or small, the kitchen is the best-loved space for making meals and memories. This home has a newer custom designed kitchen with custom built cabinetry. The layout of the kitchen easily brings you more comfort, style, and function. There is endless storage in the kitchen. The drawers slide in and out with ease and there are pull-outs and adjustable shelves. This is a kitchen where you can prepare a gourmet meal for entertaining or have taco night with the family. The ease of steps and easy access to all the kitchen features is the perfect remedy for stressful meal preparation. There is also a custom designed work/station in the kitchen that has the same craftsmanship as the cabinetry. This built-in work area is perfect for the family computer and can become the command center. The functionality of the kitchen is amazing.

The informal dining area in the kitchen is directly opened to the covered patio. This additional outdoor living space becomes an extension of the kitchen. You will love outdoor dining or entertaining. The beautiful views of the rear yard filter into the home through this great porch area.

There are three bedrooms on the main floor, one being the master bedroom with updated master bath. With the additional bedrooms in the finished basement area, you will have the option to personalize these rooms to fit you and your family's needs. One of the bedrooms could be converted into a library or den....or perhaps a child's hobby room.

The finished basement layout is also great for large family gatherings or entertaining. There are two distinct living areas that blend right into each other. You can have a technology area with the big screen and all the electronic games and still have a place for a pool table of play area.

You are sure to love relaxing in the privacy of your rear yard. There can be endless hours spent in the covered porch sipping lemonade and allowing your life to slow down.

This is a lovely, stylish home that has such an inviting casual feel. It is a home where the kitchen-dining-living room all take part in bringing together family and friends, food and fun. Call Molly today, a home this special will not last long.
